SUMMARY

Software Engineer specializing in frontend and cross-platform mobile development, with experience building reliable, user-centered applications for web, iOS, and Android. Experienced delivering production-ready fintech and web applications using React, Next.js, React Native, TypeScript, and the Expo ecosystem, with expertise in API integration, authentication, reusable component architecture, performance optimization, and modern CI/CD workflows. I also build AI-powered applications by integrating LLMs and agentic workflows to automate business processes and create intelligent user experiences. Known for taking ownership of features, solving complex production challenges, and delivering scalable, maintainable solutions that drive business value.

WORK EXPERIENCE

2025 August - Present

Baige Microfinance Bank- *Mobile & Frontend Developer*

- Developed and maintained production-ready screens across the mobile banking application, including savings, investments, bill payments, and user authentication using React Native, Expo, TypeScript, and NativeWind.
- Implemented multi-step flows such as OTP verification, PIN setup, and password reset with form validation using React Hook Form and Zod, integrated against a Backend-for-Frontend (BFF) microservice using auto-generated TypeScript clients via Orval from OpenAPI specs.
- Managed API communication using React Query and Axios for data fetching, user operations, and real-time balance and transaction updates across development, staging, and production environments.
- Debugged and resolved production crashes in authentication flows by tracing runtime errors to API contract mismatches and shipping a fix independently.
- Built reusable UI components including bottom sheets, modals, and input fields, and maintained code quality through a CI/CD pipeline using EAS Build, OTA updates via Expo Updates, and pre-commit hooks with ESLint and TypeScript checks.
- Collaborated with backend engineers, product managers, and designers to deliver new banking features and improve the mobile user experience.

2024 June - 2025 July

Varsi, Lagos - *Frontend Developer*

- Built responsive React components using TypeScript and Tailwind CSS for user authentication, course management, and dashboard interfaces,
- Implemented user login, registration, and 2FA setup flows with proper form validation using React Hook Form and Yup.
- Integrated frontend with backend APIs using Axios for data fetching, user operations, and real-time content updates
- Created data tables with filtering, sorting, and pagination functionality for managing courses, users, and analytics.

- Developed dashboard components displaying course statistics, user progress metrics, and interactive charts using Chart.js
- Built file upload components for course materials, user profiles, and document management features
- Implemented loading states, error handling, and user feedback systems for improved user experience
- Created reusable UI components including modals, buttons, input fields, and icons following established design patterns.

2023 September - MAY 2024

Lafarge Africa PLC - *Automation and Instrumentation Assistant Supervisor*

- Managed application configurations and deployment processes across multiple departments, demonstrating experience with production systems and cross-functional collaboration.
- Identified and resolved system performance issues through proactive monitoring and troubleshooting, transferable to debugging frontend applications and optimizing user experience.
- Provided technical guidance and support to various departments, developing communication skills essential for collaborating with designers, product managers, and backend developers.
- Maintained system reliability through regular monitoring and preventive maintenance, applicable to frontend performance monitoring and code quality assurance.
- Collaborated with engineering teams to implement system improvements and upgrades, demonstrating ability to work in agile development environments
- Applied problem-solving methodologies and preventive maintenance protocols that translate to frontend debugging and optimization practices

SKILLS

PROGRAMMING LANGUAGES

- JavaScript
- TypeScript
- Python
- C#

Frontend & Mobile

- React
- Next.js
- React Native
- Expo
- Tailwind CSS
- NativeWind

State Management & Data

- React Query
- React Context
- Zustand
- Axios
- React Hook Form
- Formik
- Zod
- Yup

Backend

- Node.js
- Express
- .NET

AI Tools

- OpenAI APIs
- Agentic AI
- MCP

DevOps & Tools

- Git
- Docker
- EAS Build
- Expo Updates
- ESLint
- CI/CD

DATABASE

- MongoDB
- PostgreSQL
- Firebase

EDUCATION

Federal University of Oye-Ekiti (FUOYE), Ekiti State

B.Sc. Computer Science

2024
